PROFESSIONAL SUMMARY

Aspiring Data Analyst with 3+ years of hands-on e-commerce business experience and practical experience building data analytics projects using SQL, Python, Excel, Power Query, and Power BI. Experienced in analyzing sales, product performance, customer behavior, inventory, and business KPIs through real-world e-commerce operations. Skilled in data cleaning, data transformation, exploratory data analysis, SQL querying, dashboard development, and business reporting. Built analytics projects across e-commerce, digital content, food delivery, and EV charging domains, combining technical analysis with business-oriented insights and recommendations.

TECHNICAL SKILLS

Data Analysis: SQL, Python, Pandas, NumPy, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA)

SQL: MySQL, Joins, Aggregations, Subqueries, CTEs, Window Functions, DENSE_RANK, Analytical Queries

Excel: Advanced Excel, Power Query, Power Pivot, Pivot Tables, Pivot Charts, Data Cleaning, Data Transformation, Dashboard Development

Business Intelligence: Power BI, KPI Analysis, Dashboard Development, Data Visualization, Business Reporting

Business Analytics: Sales Analysis, Product Performance Analysis, Customer Behavior Analysis, Inventory Analysis, Revenue Analysis, KPI Monitoring, Operational Analysis

Tools:

MySQL, Microsoft Excel, Power BI, Jupyter Notebook, ChatGpt

PROFESSIONAL EXPERIENCE

E-COMMERCE BUSINESS OWNER | SELF-EMPLOYED

Feb 2021 – Jul 2024

• Analyzed daily sales and order data from Amazon and Flipkart to identify top-performing products, sales trends, and business performance patterns.

• Used Microsoft Excel to monitor revenue, profit margins, inventory performance, product performance, and operational metrics.

• Evaluated product pricing and listing performance using sales data to support pricing and product-listing decisions.

• Monitored customer behavior and sales performance to identify opportunities for improving customer engagement and conversion.

• Maintained and analyzed order data to generate business reports and support operational and commercial decision-making.

• Tracked inventory movement and product demand to support stock planning and inventory management.

• Managed data-driven business activities including product listing, sales analysis, campaign performance tracking, customer insights, and inventory monitoring.

• Achieved Flipkart Gold Seller status during 2022–2023 through consistent marketplace performance and effective e-commerce operations.

DATA ANALYTICS | SELF-LEARNING & PROJECTS

2026 – Present

• Developed practical data analytics skills through hands-on projects covering SQL, Python, Excel, Power Query, Power BI, data cleaning, visualization, and business analysis.

• Applied SQL to solve analytical problems involving customer behavior, restaurant revenue, order frequency, ratings, delivery performance, and business segmentation.

• Used Excel and Power Query to clean, transform, standardize, and prepare real-world datasets for analysis.

• Built interactive dashboards to analyze operational performance, customer behavior, financial metrics, demand patterns, and business KPIs.

• Applied analytical techniques to identify trends, patterns, data-quality issues, and business opportunities across multiple datasets.

• Documented analytical approaches, queries, transformations, dashboards, findings, and business recommendations as part of project presentations.

PROJECTS

MYNTRA FASHION CLOTHING DATA ANALYSIS

Tools: Microsoft Excel, Advanced Excel, Data Cleaning, Data Transformation

• Analyzed a large e-commerce fashion dataset containing 526,564 rows and 13 columns to evaluate product, pricing, discount, category, and rating-related information.

• Performed data-quality assessment by identifying missing values, checking duplicates, reviewing data types, and evaluating the structure of key fields.

• Applied advanced Excel formulas to detect duplicates, validate missing values, standardize discount formats, and prepare data for analysis.

• Performed category-level discount analysis and calculated average discount rates across 8 product categories.

• Identified 230,261 products with discount offers greater than 50%, providing insight into discount distribution across the product catalog.

• Calculated analytical metrics including average original product price for highly rated products and category-level pricing and discount patterns.

• Applied conditional logic and calculated fields to handle missing discount-price values and prepare a more analysis-ready dataset.

AUDIBLE LIBRARY OPTIMIZATION & DATA CLEANING

Tools: Excel, Power Query, Data Cleaning, Data Transformation

• Performed end-to-end data cleaning and transformation on an Audible audiobook dataset using Power Query.

• Standardized audiobook title formatting and transformed inconsistent text values into a structured format.

• Split combined author and narrator information into separate columns to improve data structure and usability.

• Standardized release-date values into a consistent date format for analysis.

• Transformed text-based duration values into structured hour and minute fields and converted them into usable numeric/duration data types.

• Cleaned and standardized price and rating fields by identifying errors, replacing invalid values, and converting text values into appropriate numeric formats.

• Created a structured release-information field by combining release date and language attributes.

• Completed a repeatable Power Query transformation workflow to produce a cleaner and analysis-ready dataset.

SWIGGY SQL ANALYTICS PROBLEM SET

Tools: MySQL, SQL

• Designed and solved a 13-part SQL analytical problem set using a food-delivery database schema containing 10 related tables.

• Used SQL filtering and aggregation techniques to analyze customers, restaurants, orders, payments, feedback, menu items, and delivery data.

• Applied INNER JOIN and LEFT JOIN techniques to combine customer, order, restaurant, and delivery information for analytical reporting.

• Used GROUP BY and aggregate functions to calculate customer order frequency, restaurant revenue, and average restaurant ratings.

• Applied subqueries to identify customers who had placed orders and customers with specific ordering behavior.

• Used DENSE_RANK() window functions to identify top-rated restaurants based on average ratings.

• Developed analytical queries for recent orders, inactive customers, delivery-partner activity, multi-day customer engagement, and regional order analysis.

• Analyzed relationships between customers, cities, restaurants, orders, and delivery partners to answer business-oriented analytical questions.

TATA POWER EV CHARGING NETWORK ANALYTICS & STRATEGY

Tools: Microsoft Excel, Power Query, Power Pivot, Pivot Tables, Pivot Charts, Slicers

• Developed an EV charging network analytics dashboard covering 5 datasets and 5 tables across Bengaluru districts.

• Analyzed 114,000 charging sessions and 8,000 customers to evaluate charging demand, customer behavior, revenue, and operational performance.

• Evaluated performance across 65 existing charging stations and analyzed 98 proposed projects for potential network expansion.

• Built dashboard views covering usage overview, station utilization, operational efficiency, customer demand, financial performance, ROI, payback period, and expansion strategy.

• Analyzed charging behavior by month and hour to identify demand patterns and high-usage periods.

• Segmented customers by income tier to compare customer count, energy consumption, revenue, and revenue per customer.

• Evaluated district-level charging demand and station utilization to identify areas requiring operational improvement or additional capacity.

• Performed financial and investment analysis using CAPEX, annual revenue, EBITDA, ROI, and payback period metrics.

• Developed a priority classification of proposed projects and identified high-potential locations to support EV charging network expansion decisions.

EDUCATION

B.Tech in Civil Engineering

Krishna Institute of Engineering & Technology, Ghaziabad | 2011–2015

12th – CBSE

Rani Laxmi Bai Memorial School, Lucknow | 2010

10th – CBSE

Rani Laxmi Bai Memorial School, Lucknow | 2008

ACHIEVEMENT

Flipkart Gold Seller — 2022–2023

LANGUAGES

Hindi — Native

English — Intermediate
